

PUBLIC SAFETY

Tuesday Hands-on Training

Join us at HxGN LIVE, Hexagon's annual digital solutions conference!

With twice as many hands-on training courses throughout the week at no cost to you, HxGN LIVE 2019 is shaping up to be our best conference yet. Check out some of the four-hour, hands-on training workshops we've tailored for your agency on Tuesday, 11 June:

TUESDAY, 11 JUNE, HANDS-ON TRAINING

Hands-on Training: I/CAD Essentials – Level I

Focus Area – End-user | Frank Moore

Open to fire, law enforcement, and EMS users, this hands-on training course will cover the essential functions of I/Dispatcher, a product within the Intergraph Computer-Aided Dispatch (I/CAD) suite. From log on to sign off, Hexagon product experts will guide you through the basic life cycle of a unit and an event in I/Dispatcher.

Whether you're a beginner or have some experience, this session will enhance your knowledge and understanding of how I/Dispatcher works and show new capabilities added to version 9.4.

This session is for I/CAD users familiar with I/Dispatcher, I/Calltaker, and Microsoft Windows products.

Hands-on Training: I/CAD Essentials – Level II

Focus Area – End-user | Frank Moore

Dig deeper into I/Dispatcher during the second part of this hands-on I/CAD training course. See what's new and learn how to create and update events and their statuses, perform event, unit, and employee inquiries, and complete map functions, including commands, controls, and views.

This session is for I/CAD users familiar with I/Dispatcher, I/Calltaker, and Microsoft Windows products.

Hands-on Training: I/CAD System Administration – GUI Modification

Focus Area – System Administration | Duncan Kennington

Calling all system administrators! Take your knowledge of I/CAD to the next level during this hands-on training course, where you'll learn advanced system administration and configuration tasks from leading Hexagon product experts.

During this deep-dive session, discover how to:

- Modify GUI resources in Visual Studio
- Make new modifications in monitors through Windows Presentation Foundation (WPF)
- Manage GUI files in CADDDBM

This session is for experienced I/CAD system administrators and stakeholders familiar with Windows-based applications, administrative tasks, and agency workflows. You should have a working knowledge of I/CAD and I/CAD products, including CADDDBM, I/Executive, and I/Dispatcher.

Hands-on Training: I/CAD System Administration – Deployment & Centralized Administration

Focus Area – System Administration | Duncan Kennington

Hone your skills as an I/CAD system administrator during this hands-on training course. Discover how to deploy and configure your I/CAD system to improve incident response and boost productivity within your agency.

During this deep-dive session, you'll learn how to:

- Install I/CAD silently and automatically
- Use Group Policy to distribute I/CAD configuration
- Manage configuration files in CADDDBM
- Distribute map and deployment files

This session is for experienced I/CAD system administrators and other stakeholders familiar with Windows-based applications and administrative tasks. You should have a working knowledge of I/CAD and Microsoft Windows.

Hands-on Training: Intergraph InPursuit WebRMS for System Administrators

Focus Area – System Administration | Brian Evans

Your job is demanding. As you're asked to do more with less, you must also manage your data. Join us for a first-hand look into how you can leverage Intergraph InPursuit WebRMS to make your job easier. Come prepared to discuss your agency's operations for incident and traffic accident reporting, case investigations, evidence and asset management, arrest processes, and more.

During this deep-dive session, learn about:

- Administering, updating, and maintaining InPursuit WebRMS software
- Modules and common workflows
- Establishing new users
- Working with alerts, approvals, user interface customization, and approval routing

This session is for system administrators familiar with configuring and performing tasks within Intergraph InPursuit WebRMS.

Hands-on Training: Simplify Your Daily Workflows with Intergraph InPursuit WebRMS

Focus Areas – End-user | Brian Evans

Better manage resources and improve public safety in your community during this hands-on training workshop with Hexagon product experts. Discover tools within Intergraph InPursuit WebRMS to help streamline your daily routine and enhance officer safety and productivity in the field.

During this deep-dive session, learn about:

- InPursuit WebRMS modules
- Data entry and approvals
- Linking and evidence submission and management
- Common workflows

Hands-on Training: Intergraph InSight Suite – Introduction

Focus Area – End-user | Chris Klimm

First responders need accurate, complete data to make their communities safer places to live, work, and visit. Join top-notch product experts for a hands-on training session on Intergraph InSight, Hexagon's suite of public safety data visualization and analytics software for evidence-based reporting, analysis, and decision-making. Discover how you can leverage these powerful products to assess performance, better allocate resources, and improve operations within your agency.

Hands-on Training: Intergraph InSight Suite – Advanced

Focus Area – End-user | Chris Klimm

Public safety agencies collect massive amounts of data each day. But, without context, that data holds little value. Learn how Hexagon's Intergraph InSight suite transforms raw, fragmented, incomplete, and inaccurate data into usable reports so you can quickly turn knowledge into action.

During this deep-dive session, learn how to:

- Share information via the web, on-premise, or in the cloud
- Set up alerts within your agency
- Build powerful visualizations

Hands-on Training: Mobile Administration & Remote Content Management

Focus Area – System Administration | John Gaines

Maintaining a mobile fleet is critical for first responders. In this hands-on training course, Hexagon product experts will share the essentials of mobile administration for Intergraph Mobile for Public Safety and explain how to update field units with Intergraph Remote Content Management.

During this deep-dive session, learn how to:

- Send information from I/CAD and I/Mobile Data Terminal to Mobile for Public Safety
- Install, configure, and deploy Mobile for Public Safety
- Configure and deploy Remote Content Management

This session is for Intergraph Mobile for Public Safety administrators familiar with Windows-based operations and mobile data computers.

Hands-on Training: Exploring Intergraph Mobile Responder

Focus Area – End-user & System Administration | John Gaines

First responders need secure, timely access to information to make their communities safer and more resilient. In this hands-on training course, see how Intergraph Mobile Responder extends Intergraph Computer-Aided Dispatch (I/CAD) to public safety agencies, providing the information and situational awareness they need to effectively respond to and manage any crisis.

During this deep-dive session, learn about:

- IT management and configuration
- User interface overview and use

This session is for I/CAD and Intergraph Mobile Responder administrators familiar with Apple, Android, or Windows-based applications.
